

SHED REGULATOR

A shed regulator is an attachment for counter-balanced looms such as the Leclerc "Mira" or "Fanny". It allows a perfect shed on any tie-up. Used to regulate the height at which the shed opens for unbalanced tie-ups, such as Bronson, Waffle, Double Weave, circular weave, etc.

It allows the whole set of shafts to:

- rise when one shaft lowers and three shafts rise;
- lower when three shafts lower and one shaft rises;
- stay at the center when two shafts lower and two shafts rise.

Once installed, it can be used for both unbalanced and balanced tie-ups.

1039-0000	36"	\$340.00
1040-0000	45"	\$365.00
1041-0000	60"	\$395.00

DOUBLE WARP BEAM

A useful attachment when the take-up is greater on some warp threads than on others; when using a variety of threads of different sizes and elasticity in a long warp; and for some techniques requiring two warp beams.

The extra warp beam is easy to install with brackets on the back posts of the loom. Has its own brake. The beam is removable. The extra thread beam serves to separate the warp coming from the two beams. It includes the thread beam and the brackets for mounting it.
