

## VERTICAL WARPING MILL OR REEL

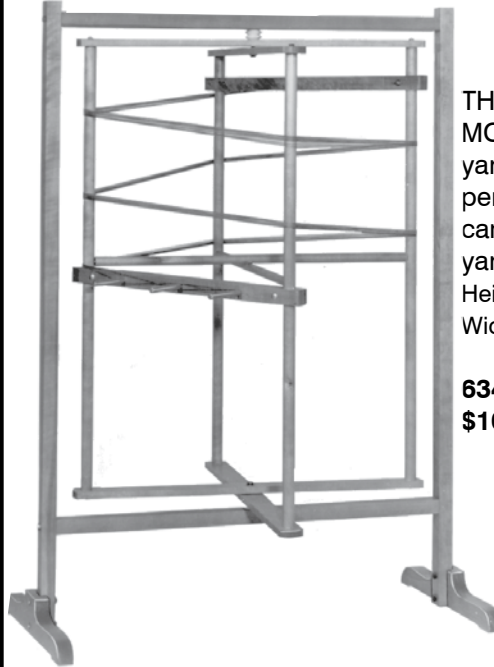

Reels are the fastest way of making chained warps with a variation of threads and colors. The cross sections that hold the pegs may be adjusted up or down, depending on the warp length. When the mill is not in use, the cross sections and pegs can be removed so that the mill folds to occupy a very limited space.

**THE TABLE MODEL** gives 2 yards (1.8 meters) per rotation and can warp up to 22 yards Long.

Height: 38" 96 cm  
Width: 26 1/4" 67 cm

**6340-2000 \$468.00**

**THE FLOOR MODEL** gives 4 yards (3.7 meters) per rotation and can warp up to 50 yards.

Height: 68" 173 cm  
Width: 59" 150 cm

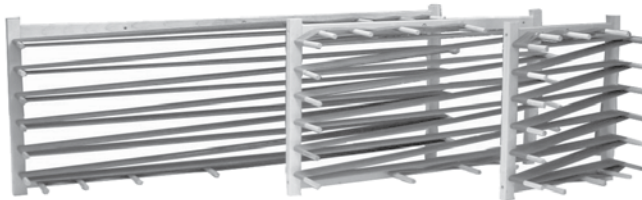

**6340-4000 \$1073.00**

## These warping boards are **WARPING BOARDS 3 different sizes**

sturdily constructed, and are easily knocked down for storage. They can be used flat on a table, or hung on a wall.

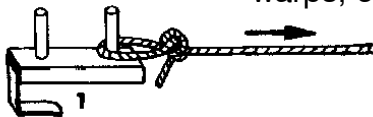

**6345-0000** For warps up to 6.5 yds long 22 3/4" x 20" **\$171.00**

**6345-1000** For warps up to 13 yds 22 3/4" X 41" **\$198.00**

**6345-5000**

For warps up to 21 yards long  
22 3/4" X 64" **\$281.00**

**WARPING PEG:** for warping small warps, clamp to top of table.

**6346-1319 \$35.00 (pair)**
